

ENGINEERED BY US

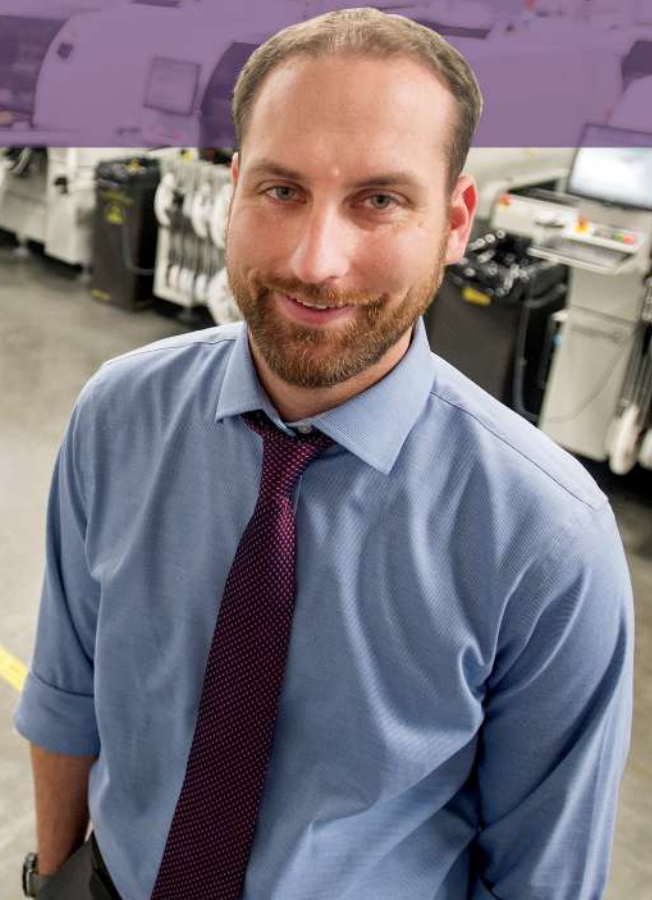

Meet Jacob Schlosser, manufacturing director for Schweitzer Engineering Laboratories in Lewiston.

Jacob and his wife, Karissa, who also works for SEL, live with their bird dogs, Belle and Charlie. He started at the company as an intern in 2004 and led multiple HR teams before moving into his current position. "I was a college kid trying to figure out what I wanted to be when I grew up. I saw an ad in the paper and applied. It didn't take long for me to realize that SEL was a place I wanted to work for a very, very long time."

Jacob says he has the privilege of working with an incredible, hard-working team that produces world-class electronic devices that control, monitor and protect critical infrastructure around the world.

"Every time you turn on the lights, there's a good chance an SEL device had a part in you being able to do so. The work is fun, the people are incredible and the company empowers us to learn and grow."
