KNOWLEDGE BY US

Within only a couple of weeks, Asotin County and Nez Perce County have been placed within the high-transmission category for COVID-19 by the Centers of Disease Control and Prevention. Unfortunately, the rate of cases doubled in our area. Washington State Department of Health's data shows that between February and June 2021, at least 94% of COVID-19 cases, deaths, and hospitalizations 12 years or older from Washington State were in those who were not fully vaccinated.

It's not too late to get the COVID-19 Vaccine.

Tri-State Family Practice & Internal Medicine has vaccine doses available to immunize patients 12 years of age and older.

Call 509.758.1450, Mon–Fri, from 8:00am – 5:00pm to schedule your vaccine today!

Please help us reduce the spread of COVID-19 in our community so we can support our local businesses, schools, and each other.
