

ENGINEERED BY US

Meet Brittany Armentrout, process engineering technician II for Schweitzer Engineering Laboratories (SEL).

Brittany and her husband, Theron, have two children, Talon, 15, and Miranda, 12. She loves the Inland Northwest and says it brings her peace like no other place in the country does.

Her regular duties involve solving problems and making processes easier for her coworkers while ensuring that SEL produces the highest-quality products possible.

"Some days, I am programming using CAD and GBR files. Other days, I am conducting design of experiments to identify which variables are affecting a process.

It is never the same, and when you find a solution, there is nothing that beats that feeling."

Brittany shows her commitment to the community by coordinating and supporting volunteer activities and fundraising at SEL for local non-profits.

MAKING A DIFFERENCE BY US

When Brittany and Theron married last spring, they requested that if friends and family wished to buy a gift, to consider donating to The Idaho Foodbank instead. After spending the past several years volunteering at the food bank, it seemed like the natural choice for them.

"I wanted to show the kids that we can make a difference and help people in need and that it doesn't take a lot of our time to make a difference," Theron said. "We keep volunteering because there is a need. If we were in need, The Idaho Foodbank would be there to help us too."

Buying LOCAL has never been more important. Please join the recovery.

**Buy local
and make
a difference.**

NUTRITION BY US

Recognizing the crucial connection between hunger and health, The Idaho Foodbank focuses on providing nutritious food and collaborates with community organizations to promote nutrition education, wellness tools and healthy living.

None of this would be possible without the support of donors, partners and volunteers in our local communities.

If you're interested in participating in their annual fundraiser, A Chef's Affaire coming up Sept. 16, go to chefsaffaire.afrogs.org to create an account and participate in the auction.

MADE BY US is possible thanks to these special partners:
