

ENGINEERED BY US

Meet Venkat Mynam, principal engineer for Schweitzer Engineering Laboratories.

Venkat and his wife, Lavanya, who also works for SEL, reside in Pullman with their two children. He has been with SEL for 15 years after having moved from his native India to pursue a master's degree in electrical engineering at the University of Idaho.

"My course work aligned with the opportunities in power systems at SEL. I used SEL products as part of my course work, listened to great guest lectures from the engineers at SEL, and finally got the opportunity to work for a reputed organization in the field of power systems."

Venkat started in SEL's Systems and Services division before moving to Research and Development in 2006.

"In both roles, working with customers and designing products and solutions to solve real world problems have been rewarding."
