

LIFESAVING CARE BY US

St. Joseph Regional Medical Center is committed to providing critical, time sensitive care and services to patients in our region.

The Heart and Vascular Center provides a wide range of care for stroke and cardiac patients in its outpatient clinic and state-of-the-art cardiovascular lab, including diagnostic angiographic procedures, pacemaker and ICD implantation and follow-up. It also has the ability to perform a wide range of cardiac diagnostic tests on an outpatient basis. Its vascular services include care for patients experiencing emergencies such as stroke or aneurysm, as well as evaluation and intervention for a wide range of peripheral vascular diseases.

St. Joseph is excited to be adding a second cardiovascular lab to serve the cardiac and vascular patients needing both elective and emergent procedures – such as those experiencing a stroke or heart attack.

Every single moment counts when having a heart attack or stroke. As the only Regional Medical Center between Boise and Spokane with both an interventional procedure lab and the expertise to provide time sensitive and lifesaving interventions and treatment, patients and families can count on the Heart and Vascular Center at St. Joe's.
