

# LIFESAVING CARE BY US

St. Joseph Regional Medical Center introduced the Da Vinci X Surgical System to our community.

The Da Vinci X Surgical System enables our experienced surgeons the ability to perform complex surgeries with enhanced high definition, three-dimensional visualization, precision, and control, resulting in lower risk of infection and complications, smaller incisions, less pain, and shortened hospital stays. Our surgical team is proud to provide this advanced technology to our patients.

“There is a difference. This new system allows us to perform minimally invasive robotic surgery with lower blood loss, speedier recovery, and minimally invasive access to provide surgery,” said President and CEO, Blain Claypool. “This is our commitment to the region. This is what we’re doing and what truly makes us different. We are the highest level of care in the region.”

“There is a difference, and we are going to continue our commitment and investment in our community to make our lives better.”

With the addition of the new Da Vinci X robotic surgery, St. Joseph continues to deliver innovative technology, with the individual focus and attention our patients deserve.

**There is a difference. St. Joseph Regional Medical Center offers the region’s highest level of care.**
