

SOLUTIONS BY US

Meet Brad Ruddell, Manager of Innovations with Emerge Technologies, powered by Inland Cellular.

Brad and his wife Deanne have two boys. Their oldest son Braden is 19 and Cooper is 16. He and his family enjoy all of the outdoor activities that the four seasons of the Pacific Northwest has to offer. In his spare time, you may find him camping, fly fishing, hunting, riding mountain bikes, dirt bikes or his RZR.

Brad has been with Inland Cellular for 12 years. "Emerge Technologies offers a full suite of solutions many businesses and individual consumers need. Whether it be VOIP business phones, fleet management, surveillance, fiber internet to your business, smart home innovations, or fixed internet to your home, Emerge Technologies can facilitate your needs. We take pride in ourselves, offering many solutions along with outstanding customer service for those solutions."

Brad's favorite thing about working at Inland Cellular is his co-workers. "I spend half of my time with these people and I wouldn't trade it for the world. We keep each other moving forward, help each other out... We have the best group!"

of Living Inland

Shopping and spending locally is a wise investment in the community you live in.

BUY LOCAL AND MAKE A DIFFERENCE.

ECONOMIES BY US

"It's important to my business that people think 'local first' when making banking decisions. Local banks build facilities here, employ local people and pay property and other local taxes. And those banks help pay for the roads and local infrastructure that we depend on every day. Most local banks sponsor local events, sponsor youth sports organizations and they employ those who live and spend money in our community. When money is spent locally, it stays here, benefiting your friends and neighbors."

- Cari Miller, Branch Manager,
Washington Trust Bank;
Lewiston city councilor
