REPAIRED BY US

In 1989, Hahn Supply purchased a tool repair business which operates as Hahn Tool Repair Center, located in downtown Lewiston at 2101 Main Street, right by Locomotive Park.

Scott Crea has repaired tools at Hahn for 31 years, joined by Mike Hartley over the last 21. They repair all major brands of power tools, nailers, compressors and generators. When you notice a decline in tool performance, or if it's taking longer to complete jobs, bring it to them for an estimate. "We'll work on nearly anything!"

Scott, Mike and the team at Hahn encourage customers to fix their tools, rather than junk them. Typically speaking, repair costs are far less than replacement costs, making it worth considering repair options first. Hahn has nearly 1,700 replacement parts at its disposal, and can send customers home with functioning tools that have optimal performance.

Visit Hahn Tool Repair to ensure your projects are always efficient and top notch.
