

# CLEAN ENERGY BY US

Northwest River Partners is focused on raising awareness about how the Northwest's hydropower system betters communities and the natural environment, and encourages science-based solutions that help hydropower and salmon coexist and thrive.

NWRP is a not-for-profit, member-driven organization that represents not-for-profit, community-owned utilities across Washington, Oregon, Idaho, Montana, Wyoming and Nevada. It also proudly represents farmers, ports, and businesses across the region that support clean energy and low-carbon transportation.

NWRP mission is to "Lead the charge for the Northwest to realize its clean energy potential using hydroelectricity as the cornerstone." It has four primary goals for the Northwest: "Fight climate change through hydro; Restore healthy fish populations; Include vulnerable communities; and Maintain a reliable electrical grid."

Port of Lewiston Manager David Doeringsfeld said NWRP helps "educate the public regarding the multi-use benefits of the Columbia-Snake River system."

"They do a fantastic job of reaching out to diverse interest groups to better inform the public regarding hydropower and salmon recovery."
